Project Status:	Data Collection and Preprocessing	Siamese CNN development	LSTM model development	Fusion model development	Evaluation
Weekly project progress summary (Must fill) and Next week assigned tasks:	- Collected artwork dataset. - Performed image rendering. - Normalisation - Data augmentation Assigned task for next week: Siamese CNN development.	- Build Siamese CNN for visual similarity learning - Learned meaningful visual embeddings LSTM model development.	- Designed LSTM for temporal price prediction. - Used sequential price data. Fusion model development.	- Combined CNN, Similarity + LSTM features. - Integrated visual + temporal learning Final evaluation	- Generated graph - Evaluated performance matrix - Prepared Research paper.
